

May 6, 2013

To Whom It May Concern,

There are two types of Sugita Aneurysm Clips that we offer: Elgiloy, a cobalt-chrome alloy, and Titanium Alloy. Both of these products have been tested and proven safe up to 4.0 Tesla.

**SUGITA CLIPS HAVE ALWAYS BEEN MANUFACTURED FROM MR SAFE MATERIALS.  
SUGITA CLIPS HAVE NEVER BEEN MANUFACTURED FROM STAINLESS STEEL.**

Sugita Elgiloy Aneurysm Clips were approved for sale on a commercial basis in the United States in 1983 and have always been manufactured with the same materials.

Please note the following:

A “**MR Safe**” device is defined as one which has been demonstrated to present no additional risk to the patient or other personnel, but may affect the quality of diagnostic information→Elgiloy.

A “**MR Compatible**” device is defined as one which is “MR Safe” and has demonstrated to neither significantly affect the quality of the diagnostic information nor have its operation effected by the MR device→Titanium.

For further reference please visit page 788 of Volume 87 of the *Journal of Neurosurgery*, November 1997.

If you require further assistance please do not hesitate to call 1-800-699-2547.

Sincerely,

Joshua Truitt  
Sales & Marketing Manager  
Mizuho America, Inc.
