

Mizuho America, Inc. 30057 Ahern Avenue Union City, CA 94587 800-699-CLIP(2547) TEL:510-324-4500 FAX:510-324-4505

November 11, 2015

To Whom It May Concern,

There are two types of Sugita Aneurysm Clips offered: Elgiloy, a cobalt-chrome alloy, and Titanium Alloy. Both of these products have been tested and have are MR Conditional up to 3 Tesla.

SUGITA CLIPS HAVE ALWAYS BEEN MANUFACTUED FROM MR CONDITIONAL MATERIALS. SUGITA CLIPS HAVE NEVER BEEN MANUFACTURED FROM STAINLESS STEEL.

Sugita Elgiloy Aneurysm Clips were approved for sale on a commercial basis in the United States in 1983 and have always been manufactured with the same materials (cobalt-chrome alloy)

The clips referenced above may cause artifacts to be visible depending on the MRI adjustments.

Per the latest guidance from the FDA, "Establishing Safety and Compatibility of Passive Implants in Magnetic Resonance (MR) Environment" Dated Dec. 11, 2014 the potential of artifacts (dependent of MRI settings) causes the aneurysm clips specified above to be categorized as MR Conditional. This is solely a function of potential visual artifacts dependent on the particular MR setting. No Risk of dislocation within the patient or heating of the implant is present.

If you require further assistance, please do hesitate to call 1-800-699-2427.

Quality Assurance Manager

Mizuho America, Inc.
